ACADEMICS

Bachelor's in Computer Science, University of Washington-Seattle   **Expected Graduation: June 2025**
Relevant courswork: Data Structures and Algorithms, Software Design and Implementation, Systems Programming
Cumulative GPA: 3.93

EXPERIENCE

Amazon - Amazon One   **Seattle, United States**
Software Development Engineer Intern   *June 2023 - Sep 2023*

- Led the development of a **data pipeline** that generates daily Amazon One customer reports for partners and is **200% more efficient** than the current process.

- Utilized **AWS Lambdas and Kinesis Firehose** to process and transfer HTTP request data to a **WorkDocs site** while following industry-standard software development guidelines.

- Completed all project milestones **a week before the end date**, and delivered a project presentation to **over 40 Amazon One stake-holders**.

Eat Together   **Seattle, United States**
Co-founder/Development Lead   *Feb 2022 - Present*

- Spearheading the development of a **React Native** mobile app that helps students organize and schedule meetups, which has gained **60+ beta testers** and helped organize **100+ meetups**.

- **Leading meetings** and helping other team members with **assigning** tasks, code and design **reviews**, **debugging**, and **app testing** sessions.

- Pitched Eat Together at the Dempsey Startup Competition, where we placed in the **top 36 teams (out of 83)**.

- Achieved **over $1500 in funding** via sources like the 2023 Husky Seed Fund.

Harled Inc.   **Waterloo, Canada**
Software Engineer Intern   *Aug 2020 - Nov 2020*

- Collaborated with a team of **5** students to create a real-time **flight-mapping** platform **from scratch** using the **MERN stack**.

- Developed flowcharts and **Figma** prototypes/mockups, and utilized **React and Leaflet.js** to create a flight map and dashboard.

- Implemented **external libraries and polylines** to map out geodesic flight paths for airplanes, and linked the **React** frontend to **Node.js** endpoints and a **MongoDB** database of flight information.

PROJECTS

AirFlip - Javascript, Python, React, Tensorflow, Web Speech API

*A web application that helps users seamlessly swipe through PDF documents using **gesture detection** and **speech recognition**; won a **Finalist (top 17 projects) Award** at **Hack the North 2021**.*

- Developed a **React** user interface that includes a PDF viewer and webcam video footage, and utilized the **Web Speech API** to flip the document after speaking key words.

- Linked the frontend with a **Tensorflow MoveNet** machine learning model that detects head gestures to flip the PDF.

Markov Chain Lyrics - Python, Flask, React, BeautifulSoup, Genius API

*A web application that uses **Markov Chains** to generate lyrics from various song artists.*

- Utilized the **Genius API** to obtain URLs to lyrics of popular pieces from an artist, and used **BeautifulSoup** to scrape these lyrics.

- Created a Markov Chain using **object-oriented programming in Python** to generate lyrics from previous words, and built a full-stack app using a **Flask** backend server and a **React** user interface.

TECHNICAL SKILLS

- **Programming Languages:** Python, Java, Javascript, HTML, CSS, LaTeX, C/C++, TypeScript

- **Frameworks:** React, React Native, jQuery, Flask, BeautifulSoup, Processing, Node.js, Svelte, Sklearn, Pandas, PyTorch

- **Technologies:** Firebase, Google Cloud, AWS, Figma
